Release Notes: Weekly Update 11/11

Team: Riley Georgen-Schwartz, Zack Marsh, Allen MacFarland, Lincoln Gubser, Vidita Mulik

New Features

Calendar

- Changed the theme and button textures to make them look more modern (Riley).

Booking Pages

- Created CSS file to use for both booking page and confirmed page, wrote CSS for both, and linked the file to both pages.

Dashboards

- Added a sidebar with ways to navigate the page and a create event button for the user to create new events that volunteers can sign up for (Riley).
- Added some dashboard CSS and connected it to the minion-dashboard. (Zack)
- Updated the page theme using rounded containers and a grey background to make the page look more modern (Riley).
- Added the org backend and connected it with the org frontend (Allen)
- Wrote queries for minion backend (Vidita - 1)

Layout and Navigation

- Added the logo to the navigation bar for branding (Riley).
- Login page added with login.hbs and message.hbs modified (Vidita -3)
- Added footer.hbs (Vidita - 2)

Automatic testing

- Expanded automatic testing (Allen)

Volunteer Backend

- Fully implemented register and login POST requests (Lincoln)
    - They add/check the DB and a user’s session cookie is saved
- Also implemented /volunteers/getEvents that returns all events
