Team Number – 2

Team Name - VAZLR

Team Members

- Vidita Mulik - Vid1M7ita
- Allen MacFarland - SirAlienTheGreat
- Zack Marsh - ZackM11
- Lincoln Gubser - ysu11
- Riley Georgen-Schwartz – rgeorgen10

Application Name - VAZLR

Application Description - Volunteer matcher - matches volunteers with nonprofits. Provides an interface for volunteers and an interface for nonprofits. Includes a tag when we verify a nonprofit as legit.

Audience - Volunteers who want to be minion labor; organizations that want free minion labor

Vision Statement - To connect humans to work for humanity in a few clicks.

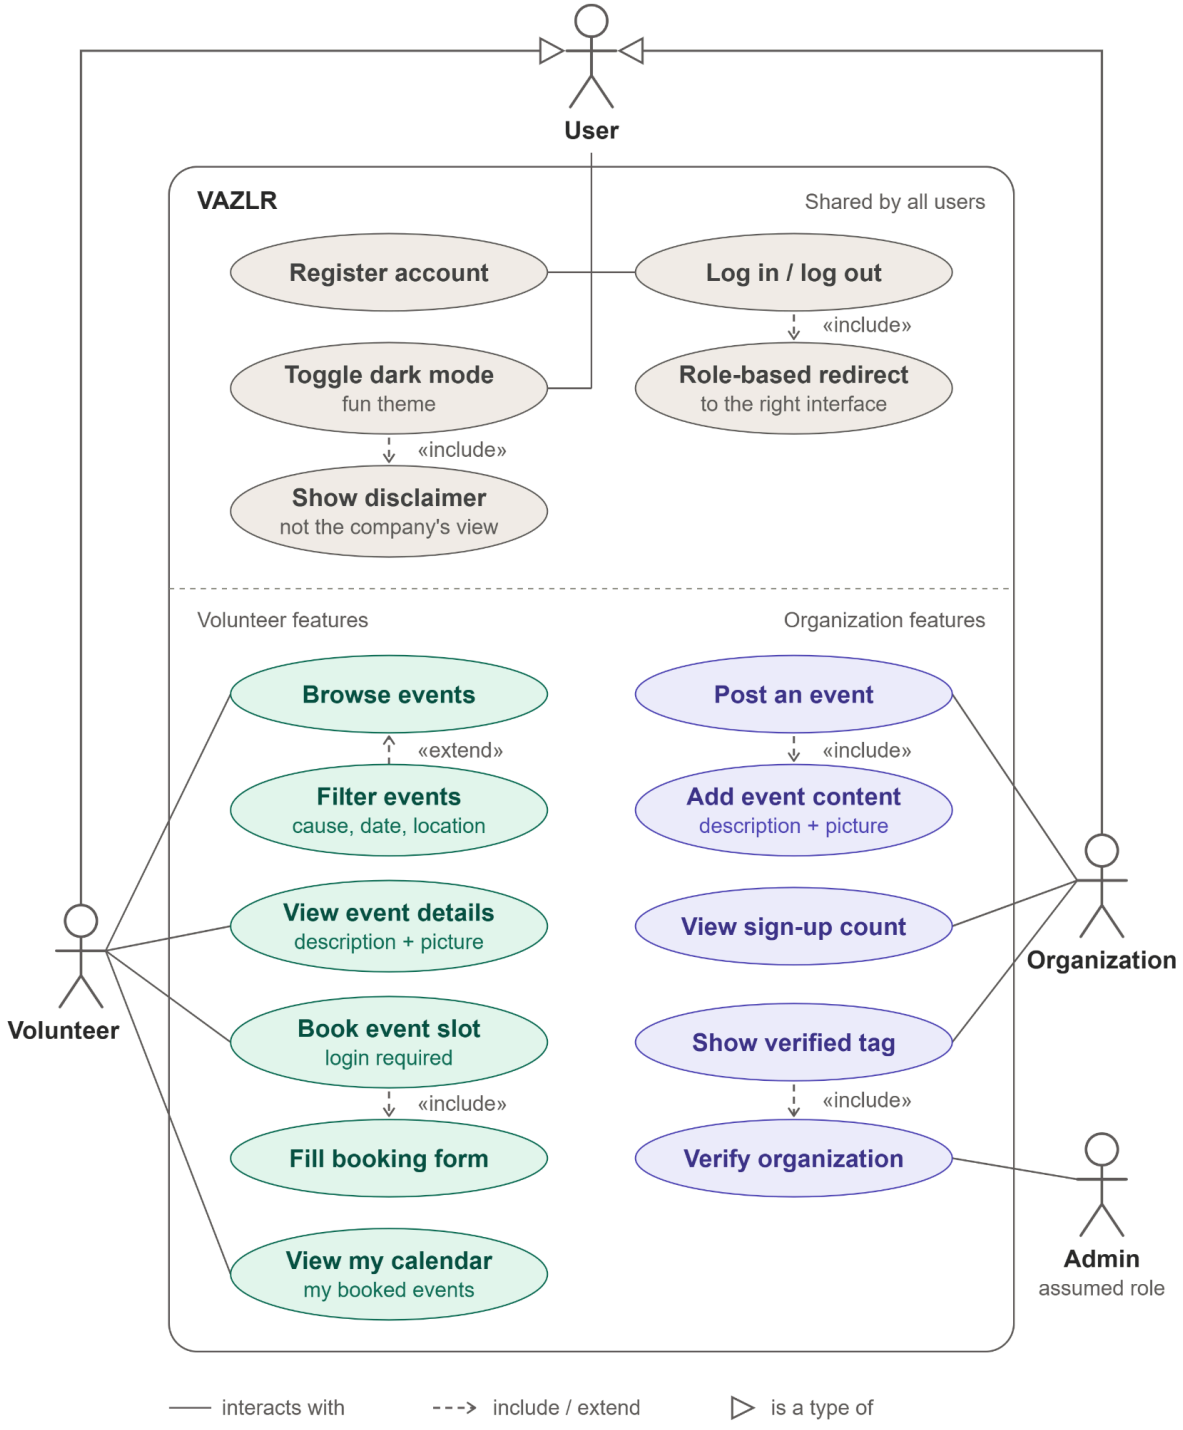

Version Control - https://github.com/ZackM11/Vazlr.git

Development Methodology - Waterfall

Communication Plan – We will communicate over discord.

Meeting Plan - Tuesday at 11:00 - CSEL; 6:00PM on Wednesdays

Use Case Diagram -

Extra Credit – Risks with project

- Minions don't show up when they say they will
  - Include a captcha to filter out bots, and ban minions if they miss too many meetings
- Organizations are scams
  - Include a verification scheme where masters email us and we manually verify them

- Not enough minions sign up
    - We will generate advertisements that we would post online (we won't actually do this for cost reasons)
    - When you log in as a minion, masters are listed as "Generous Philanthropists", and it tells you about how you will change the world. It also refers to you as a hero
- Not enough masters sign up
    - When you log in as a master, it gives you tips to exploit your minion labor
- A user enters "); DROP TABLE minions ;" into a text box
    - All inputs will be validated

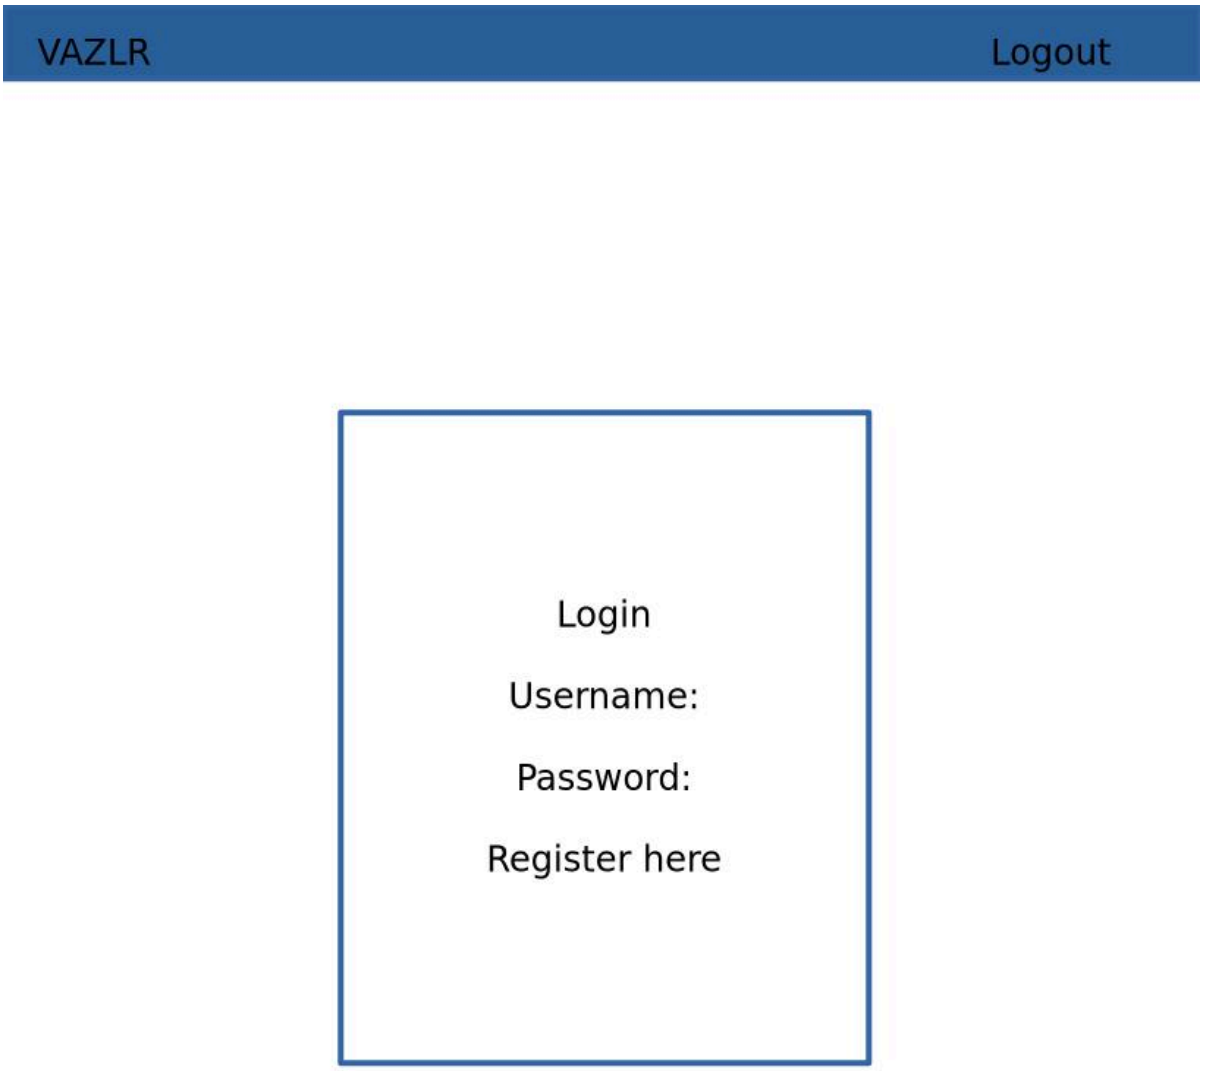

Things that need to be done: put in milestones folder

Allen will set up docker after class today

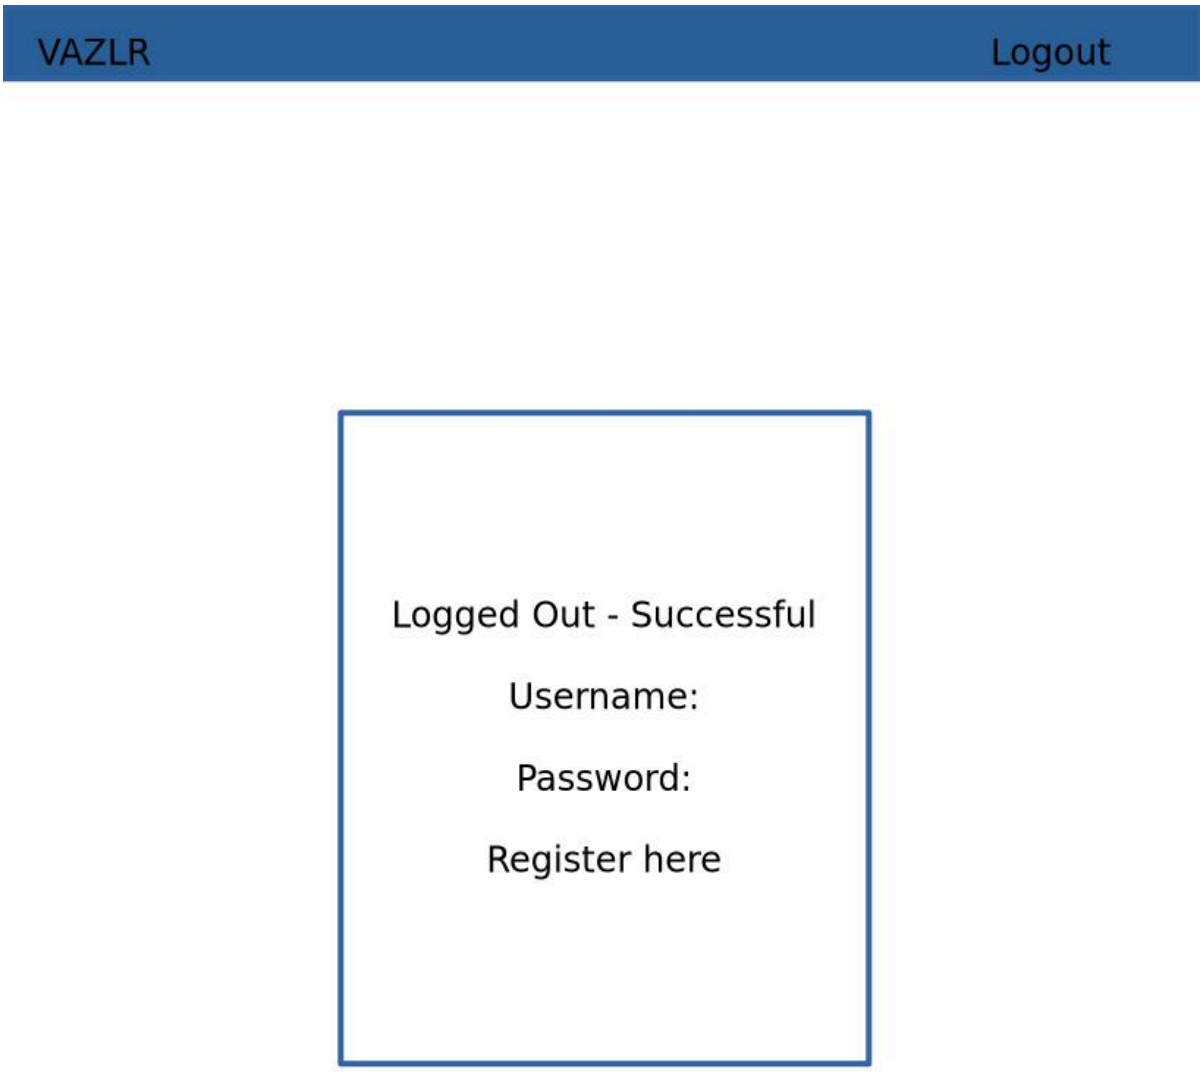

- Vidita: **Database + login page front/back**
    - Will create the tables and design the queries for both backends
- **Minion view**
    - Zack: Frontend
        - HTML/Bootstrap
    - Lincoln: Backend
        - NodeJS
- **Organization (master) view**
    - Riley: Frontend
    - Allen: Backend
